PROFESSIONAL SUMMARY

Business Analytics professional with a business first mindset, translating data into measurable business outcomes. Skilled in Python, SQL, end-to-end ML pipelines, statistical modelling, and BI dashboarding.

EXPERIENCE

Junior Business Analyst

Jan 2024 – Jul 2024

Crytonix Remote Tech | Chennai, India

- Aligned product release strategy across 3 cross functional teams by translating client requirements into structured functional plans, user stories, and end to end module workflows reducing stakeholder miscommunication by an estimated 40%.
- Managed and validated API integrations with 5+ client systems, executing functional and user flow testing to ensure data integrity, security compliance, and seamless UX alignment.
- Partnered with Agile/Scrum development teams in sprint planning, backlog grooming, and acceptance criteria definition to deliver features on schedule.

Business Analyst Intern

Feb 2023 – Jul 2023

Foyr | Hyderabad, India

- Analyzed subscription based customer dataset of 10,000+ users to uncover behavioural trends and churn signals, informing product and marketing strategy.
- Built and maintained executive facing KPI dashboards in Tableau tracking customer engagement, subscription growth, and retention reducing report turnaround time by 30%.
- Collaborated with product and engineering teams to convert analytical findings into data driven acquisition and retention strategies, contributing to a measurable improvement in monthly active user engagement.

PROJECTS

Document Intelligence RAG System

Jan 2026 – Apr 2026

- Built an end to end document intelligence pipeline with OCR ingestion, structured extraction, and page level audit traceability. Implemented a hybrid RAG system (semantic + keyword retrieval) delivering citation backed, audit ready outputs with <5% hallucination rate in validation testing.

Telco Churn Prediction & Deployment

Feb 2026

- Architected a production grade churn prediction system using Logistic Regression (ROC-AUC: 0.83, recall: 78%). Integrated FastAPI for real time scoring, Streamlit for interactive dashboards, and Tableau for risk segmentation enabling proactive retention targeting on 15%+ at risk segments.

Predictive Marketing Campaign Optimization

Jan 2026

- Developed a predictive targeting model that increased campaign response rates from 15% to 42% and captured 83% of likely responders in the top 30% customer segment, reducing cost per acquisition by 2 times.

NLP Topic Modelling – Social Media Analysis

Sep 2025 – Dec 2025

- Designed a scalable unsupervised NLP pipeline using SBERT, UMAP, HDBSCAN, and BERTopic to extract coherent topics from 100K+ global social media posts. Engineered a custom stance analysis framework (PCA, KMeans, TF-IDF) to surface opinion clusters without labelled training data.

Airbnb Listing Segmentation (NYC)

Feb 2025 – Apr 2025

- Built unsupervised ML pipeline (PCA + KMeans) to segment NYC Airbnb listings, preserving 98% variance and identifying 4 distinct host/listing profiles. Mapped spatial distribution with Folium for location-driven market insights.

EDUCATION

M.S. in Business Analytics

Aug 2024 – May 2026

University of Texas at Arlington | Arlington, TX

Coursework: Data Science, Machine Learning, Data Mining, Data Warehousing, Cloud Computing(AWS), Marketing Analytics, Economic Forecasting, Python, Statistics for Business

PG Program in Data Science & ML

Nov 2022 – Dec 2023

National Institute of Information Technology | Chennai, India

Coursework: Advanced Excel, SQL, Tableau, Python for Data Science, Machine Learning, Time Series Forecasting, NLP

SKILLS & CERTIFICATIONS

Languages & Databases: Python, SQL, R, PostgreSQL, MySQL

ML / Analytics: Scikit-learn, Pandas, NumPy, NLTK, SpaCy, BERTopic, SBERT, Logistic Regression, Random Forest, XGBoost

BI & Visualization: Tableau, Power BI, Streamlit, MS Excel, Matplotlib, Seaborn, Google Looker Studio, IBM Cognos

Tools & Platforms: FastAPI, Docker, Kubernetes, Databricks, GitHub, Jira, Figma, AWS, DBeaver, phpMyAdmin, pgAdmin

Methodologies: Agile / Scrum, A/B Testing, Stakeholder Management, Requirements Gathering, API Testing

Certifications: Google Data Analytics, AWS AI Practitioner, SAP Business Analyst, IBM Data Management, Microsoft AI Product Manager
